SAMpeople's BI Connector

Focus on strategic workforce planning, not manual data exports

Get actionable insights from your SAMpeople data in your BI tool. Connect your HR data to create custom visualisations and build insights to inform workforce planning. See and analyse your SAMpeople data in your BI tool to build the insights you need for your trust.

Collect and analyse data across multiple schools, providing you with a comprehensive view of workforce trends across; employee contracts, salary, allowance, and absence.

Consistent, transparent reporting
Share clear, compelling BI visualisations with trustees, governors, and your leadership team, in just a few clicks.

Smarter insights, actionable decisions
Combine SAMpeople data with other sources like Google Maps and deprivation indices for a deeper understanding.

Seamless scaling, no manual workarounds
As your trust grows, new schools' data is automatically added.

The BI connector seamlessly integrates with **Microsoft Power BI, Google Looker Studio and Tableau.**

The SAMpeople's BI Connector is included in the standard SAMpeople package.

Ready for a demo with SAMpeople?
